FALL'24

HOVER POTATO CHIP

KITE AND PUMP FOILING

KBKF-HPO25-WH 516.50092.000 Sizes: 110

DESCRIPTION

Say hello to your new best friends in your kite and pump foiling adventures... introducing two brand new shapes to the lineup, the 2025 Potato Chip and Mother Chip boast new optimized shaping and innovative technology. While the Potato Chip, our pick for intermediate kitefoiling 8 dockstarts offers increased nose volume and width, and the Mother Chip, ideal for bigger riders or beginners tackling kite or

tow foiling, both boards are super versatile and can handle any task you put them to. Highlighting larger beveled rail design for better clearance, easy touchdowns and acceleration, these two boards are your ticket to a sensational session on the water.

WHAT'S NEW

An entire redesign with new shapes, new constructions and new features

Outline design - increased nose width for easier starts and effortless taxiing and touchdowns

Larger bevel rail design - achieving better clearance when riding and a smaller footprint at micro touchdowns

Dual concave nose area bottom shaping minimizing drag on touchdowns

EVA pad achieving a light weight, durable high traction pad

Dual density foam core construction on the Potato and Mother Chip

FEATURES

Shape Redesign An entire redesign of shapes, constructions and features

Optimized Outline Increased nose width for easier take-offs, momentum on pumping and effortless taxiing

Larger Bevel Rail Design Better clearance on foil and a smaller footprint on touchdowns resulting in a more efficient flight

PVC/UD Carbon Construction PVC core, biax carbon + UD carbon strips, high tesile fibreglass

Dual Concave Bottom Shaping Minimizing drag on touch downs in the nose of the board

EVA Pad A durable, lightweight and high-traction pad

Footstrap Inserts Gives rider the option to mount footstraps (not included)
